## HACK BUSINESS IN GITY IS ON DEGLINE

The hack stand at the corner Richards and Hotel streets, known as the drivers of the backs that use this place being anwilling longer to pay the rent of \$100 a month which, on ac-

they feel they can no longer afford. This stand has been one of the best kepi and most orderly of the city and those who have been in the habit of dropping around there for a conveyance, will regret that the hackmen have decided to move.

The 32 men will move to the Club Stables on Fort street.

In connection with hacks, it might Beretania as the stated that there is little short of a New Year's. panic among the drivers and many are giving up their conveyances and This falling off in the business that

was once such a flourishing one in Hosolulu, was very noticeable on Tuesday night last when people were on their way to the opera house to the en-tertainment of the Dramatic Circle of the Kilohana Art League.
On that occasion, a hack was a rar-

Sliva, which has been dragging along in the courts for a number of months in a fight to prevent the payment of alimony promises to reach a conclusion soon. On Wednesday morning Judge Robinson ordered the defendant, M. G. Silva, to furnish a bond within five days in the sum of \$1000 for the payment of the accrued alimony, anuncing that upon the furnishing of such a bond the order to show cause would be dismissed. The Court further intimated that if the bond was not furnished within the five days that a motion for the appointment of a receiver of the property of the defendant would then be entertained.

### THE GROWTH OF EARS.

The systematic examination of more than 40,000 pairs of human ears in England and France has resulted in some interesting conclusions. For one thing, it is ascertained that the ear continues to grow in the later decades of life; in fact, it appears ney to stop growing until death. If one will take the trouble to look around in any assemblage of people, as at church, he will discover that the old folks have ears considerably larger than those of the middle aged. A woman who has small, shell-like ears at twenty years of age will be very apt to possess medium sized cars at forty years and large

ears at sixty. Why ears should go on growing ait one's life any more than noses is a mystery. There are a good many points about them that are instructive, their shapes being markedly persistent through heredity. Any car will be handed down, so to speak, from father to son for generation after generation with comparatively little modification. Some authorities on criminology assert that criminals are very apt to possess a peculiar kind of ear, which is recog-nized by an expert in such matters. There is probably nobody in the

world who has a pair of ears perfectly matched; in most people the two differ perceptibly, not only in shape, but also in size. Frequently they are not placed precisely alike on the head. The age of a person may be judged with great accuracy by the ears, which You will find them with after youth is past assume an increasing harshness of contour.
